Bmw N20 Engine

The BMW N20 is a turbocharged four-cylinder petrol engine which replaced the N53 (or BMW N52 in some markets) and was produced from 2011-2017. Although the N20 is a four-cylinder engine, it is considered a replacement for the naturally aspirated six-cylinder N52/N53 because it powers equivalent models, producing similar horsepower to the N52/N53 with greater low-rpm torque and better efficiency.

4 Cylinder BMW N20 Engine. The quick up-shifting in daily driving will keep the engine's rpm very low, which will cause the 4 cylinder engine to oscillate a lot more than would have been, if it driven on the autobahn at high rpm, where there are no oscillations are really present.

BMW N20 timing chain and oil pump chain issues

BMW just redesigned the n20 timing chain related components and my 328i would be one of the first to receive the update. The bad news is that the parts are on back order and likely won't arrive until next week. The good news is that BMW recognized the timing chain components in the N20 and N26 engines were prone to failure.
