Carrier Mini Split Unit Installation

What is a Ductless Mini Split System? Take a closer look at the question, and you'll find the answer. It's ductless because it's a heating and cooling system that requires no ductwork; it's a split system because there are separate indoor and outdoor units; and it's mini because the units are smaller than a typical central air system.

...

All mini split systems require a dedicated circuit to supply power to the system. A disconnect box is required by code to be installed near the outdoor unit and allows for a technician to shut off power to the system when performing any service or repairs. Believe it or not, a non-fused disconnect box is preferred over fused.
