Bleeding the brake system after changing the brakes can be hard on some anti-lock braking systems. The good news is that on some GM vehicles, a scan tool isn't needed to bleed ABS brakes. A scan tool is only needed with a DBC-7 anti-lock braking system, and then only if air entered the ABS modulator during brake ...

Unfortunately it does sound like there is a leak somewhere in the brake lines or the brake caliper piston seal. If a hole is created on the top of the line then the fluid will spray up instead of down and depending on where on the car the leak is located it may be puddling somewhere else, therefore you won't see a puddle on the ground indicative of a leak.
