Data Mining: Concepts and Techniques

Data Mining

Classification is a form of data analysis that releases models that describe important data classes. Such a model, called classification, predicts categorically (discrete, non-sequential class labels). For example,

Solution Manual

Data mining is an interdisciplinary subfield of computer science and statistics with an overall goal to extract information (with intelligent methods) from a data set and transform the information into a comprehensible structure for further use. Data mining is the analysis step of the "knowledge discovery
