Experimental Design. Experimental Design. By Saul McLeod, updated 2017. Experimental design refers to how participants are allocated to the different groups in an experiment. Types of design include repeated measures, independent groups, and matched pairs designs. Probably the commonest way to design an experiment in psychology is to divide the participants into two groups, the experimental group, and the control group, and then introduce a change to the experimental group and not the ...

haphazard) experimental design (Cochran and Rubin, 1973; Barnard, 1998). An evaluation of the  
Bureau's job training programs is an instance where a randomized experimental design would have  
been both impractical and unethical, and perhaps may have created legal challenges as well.  
Random allocation to these programs would have been
