Freedom Evolves

Freedom Evolves is a 2003 popular science and philosophy book by Daniel C. Dennett. Dennett describes the book as an installment of a lifelong philosophical project, earlier parts of which were *The Intentional Stance*, *Consciousness Explained* and *Elbow Room*. It attempts to give an account of free will and moral responsibility which is complementary to Dennett's other views on consciousness and personhood.

Freedom Evolves - Wikipedia

Freedom Evolves (2003) is the third volume in Dan Dennett's quintet of philosophical works devoted to showing the grandeur in the view of life promoted by Charles Darwin's discovery that all aspects of life derive from "slowly and beautifully adapting each form to the most complex relations of life." (Darwin, *Origin of Species by Natural Selection*, p. 469.)
