Plants also move toward the light. Seeds push little leaves up from the ground into the light. A house plant in a dark

# Acces PDF Hypothesis Testing Phototropism Grade 12 Practical Memo

room will grow toward the light. This movement in response to light is called phototropism. When a plant moves toward the light, it's called positive tropism. When a plant moves away from light, it's called negative tropism.

plants that have light stimuli grow toward the light better than the plants that are in the shade. Hypothesis: Phototropism Virtual Lab The hypothesis provided for this experiment is that the seedling meristem are affected by light and bend towards the light source that is

# Acces PDF Hypothesis Testing Phototropism Grade 12 Practical Memo

provided. The hypothesis will be tested by using a positive control, a negative control, and experimental control.

## **Hypothesis Phototropism Virtual Lab The hypothesis ...**

A group of Grade 12 learners wanted to investigate the effect of light coming from one direction on the growth of

# Access PDF Hypothesis Testing Phototropism Grade 12 Practical Memo

shoots. They planted some wheat seeds in two seed trays and allowed it to germinate. When young shoots appeared above the soil level, the shoots were exposed to light from all directions for three days.
