Geometric Optics

Victoria Tapia Lenses Virtual Lab using
PhET Geometric Optics PHYS 111-002
March 30th, 2020. Introduction : The
focus of this lab is to demonstrate the
formation of images from convex and
concave lenses. The focal point of a
concave lens is the point where light
rays parallel to the axis seem to diverge

Read PDF Lenses Virtual Lab Using Phetgeometric Optics

Answer

from after passing through the lens. The distance from the lens to that point is called the focal length of the lens.

Lenses Virtual Lab using PhET Geometric Optics - tapia.doc ...

Lens; Optics; Description How does a lens form an image? See how light rays are refracted by a lens. Watch how the

Read PDF Lenses Virtual Lab Using Phetgeometric Optics

Answer

image changes when you adjust the focal length of the lens, move the object, move the lens, or move the screen.

Sample Learning Goals Explain how an image is formed by a converging lens using ray diagrams.
