It contains both a theoretical study of compilation techniques ...

### Kenneth Louden's Compiler Construction Text

Kenneth C. Louden Compiler Construction: Principles and Practice features a comprehensive, hands-on case study project for constructing an actual, working compiler. This case study involves a relatively simple programming language that will expose readers to the basic concepts used (and potential pitfalls) in constructing larger compilers.

### Compiler Construction: Principles and Practice | Kenneth C ...

Compiler construction is relatively hard topic with lot of theory needed to be understood before you can write even the most trivial compiler. Regular expressions, finite automata, BNF or attribute grammars are just few things you need to know and known them very well before you can write your own compiler.

CoCoDo is not a workshop, it is a coding dojo. Instead of preparing a paper and giving a short presentation, participants will enjoy the entire day of programming. The topic of CoCoDo is compiler construction: the oldest branch of computer science, which has been accumulating useful techniques since 1950s. Compiler construction comprises, but is not limited to, lexical analysis, syntactic ...
