Thermal & Emissions Energy-efficient in practice, precise temperature control. Improved energy efficiency, less CO₂, lower NO_x values, yet at the same time more comfort, safety and driving pleasure: With its innovative drive solutions precisely tailored to any requirements, Bühler Motor provides effective support here - and offers outstanding system expertise.

Thermal & Emissions - Bühler Motor

A motor-generator system mainly performs motor control to provide motive power and also controls regeneration via the motor acting as a generator. Advances aimed at lower fuel consumption and reduced CO₂ emissions are being made constantly in motor and regeneration control, and they require microcontrollers (MCUs) with high performance and advanced functions.
