When you set up the front light, make sure you keep it eye level to the subject you're photographing. The lighting may be a bit bright. Try dimming it and raising your exposure (ISO + shutter speed combination) up a notch or two. If your product is reflective, this setup will not work for you.

Best Tips for Perfect Product Photography Lighting Setup

Take readings of the highlight and shadow areas. The difference between them is the contrast range, typically referred to in the number of f/stops difference. If the shadows read 1/125 sec. @ f/4 and the highlights read 1/125 @ f/16 the contrast range is four stops. I rarely care about the specific number of stops.

Best Lighting for Still Life Photography? - Photography Course

For my studio I use Alien Bees studio flash units with a 60" moon light, and for location shooting I use a Profoto kit with a umbrella kits and a variety of snoots. I also use a 4x6 ft Sunbounce reflector and sev-eral 36' round reflector diffusers, and several 54" scrims, some cookies, flags, white foamcore boards

Photography Lighting Secrets

2. Loop Lighting. Loop lighting is made by creating a small shadow of the subjects noses on their cheeks. To create loop lighting, the light source must be slightly higher than eye level and about 30-45 degrees from the camera (depends on the person, you have to learn how to read people's faces).
