Math Times Tables - Kidzone

The ten times tables are by far the easiest as they require no understanding about how the tables work. To multiply any number by 10 you simply put a zero on the end of it. $1 \times 10 = 10$. $4 \times 10 = 40$. $9 \times 10 = 90$. And this works with any number. $16 \times 10 = 160$. $37 \times 10 = 370$. $98 \times 10 = 980$.

3 easy ways to teach your child times tables at home ...

Math games with a multiplication chart can be used to get better fluency in computations. These can be used to analyze different times tables - 4 times table, 5 times table, 6 times table, 8 times table, 9 times table, and 12 times table - which would give them a clearer understanding of the concept than just by-hearting the times tables.
