A contract web-design project is no different. An important first step in any contract web design project is finding and on-boarding the right person for the job. That's 50% of your success right there. The rest of it is an outcome of how much the contracting parties can agree upon and get done in a defined period of time.

5 Free Web Design Contract Templates You Should Keep Handy

The most important thing when doing contract-first Web service development is to try and think in terms of XML. This means that Java-language concepts are of lesser importance. It is the XML that is sent across the wire, and you should focus on that. The fact that Java is used to implement the Web service is an implementation detail.
